How to grant proxy access to student record information in CaneLink

You control your information. The process of creating and maintaining a proxy account is controlled by you. You must grant approval for all proxies and you can select which services proxies may access on your behalf.

1. Log into canelink.miami.edu and navigate to your Student Center.

2. Once inside your Student Center, click on the “Share My Information” tab located on the right-hand side of the page.

3. You will then Navigate to the “Share My Information” summary page. This page will list individuals to whom you have provided access to your student information. Here you can provide access to new proxies and modify or delete existing proxy access.
Accept the "Terms and Conditions" relating to the Federal Family Education Rights and Privacy Act (FERPA) to provide your proxy access to your student record information.

Complete the Share My Information form and select which transactions your proxy can access. You have the ability to select one, some, or all of the sharable information under "Transaction Name."
Once you select “Save,” you will be notified that an email will be sent to your proxy affirming that access has been granted.

After clicking “OK,” a confirmation is posted indicating that the process was successful.

At this point in the process, you will be able to see the status of your actions on your Share My Information summary page. Notice that the status of the transaction is “Submitted” and the Contact Status for the proxy is “Unknown.” This will change once the proxy has completed and submitted all of the required information.

For information about what step the proxy must follow, refer to miami.edu/proxyguide
